Discussion:

Please write a small paragraph discussing teamwork (who did what, how much, was the work allocation fair, did each member respect commitments and deadlines...).

For the second deliverable, the workflow was a bit slower. Between midterms, medical emergencies and homework, we've mainly put our work into adding additional features as well as making the backend work in our favor. We worked with React.js and JSON to make our website interactive with data. For this part of the project, Eric did most of the React.js with Karolina and Oliver helping and implementing to other pages. We did not see any progress on Paul's side.
